

## FEEES FOR ON-LOT SEWAGE

APPLICATION for a permit, planning exemption, or planning module. If not completed in one year, a new application must be applied for and a new fee paid. The fee includes a permit to replace a tank . . . \$100.00/submission

TEST PIT: One test pit is required for each 1200 sq. ft. of absorption area and one additional pit is required at the opposite side of the absorption area. All pits dug must be recorded. The backhoe is the applicant's responsibility . . . \$50.00/pit+\$100.00/trip

HOLE PREPARATION for a percolation test . . . \$300.00/six holes

PERCOLATION TEST: Six perc. holes are required for each 1200 sq. ft. of absorption area . . . \$300.00/six holes

CHECK DESIGN or layout of an absorption area for a new or repair system . . . \$100.00/1200sq.ft./submission

SITE INSPECTION: Any trip to a site required to complete an application. Including a scheduled trip that the work could not be completed because the applicant was not prepared. Minimum of five for each absorption area (test pits, check layout, pre-construction, approval to cover, and final inspection) . . . \$100.00/trip

REVIEW PLANNING for a module, planning exemption, or non-building waiver . . . \$100.00/submission plus  
\$100.00/each new equivalent dwelling unit

SYSTEM EVALUATION of an existing sewage system. The applicant is responsible for uncovering and cleaning all tanks, digging the probe and observation hole, and supplying sufficient water . . . \$300.00

APPEALS from the denial, revocation, or granting of a sewage permit . . . \$500.00 plus cost  
of any advertising, engineering,  
court stenographers, and consulting  
fees incurred by the Township

If within one year of paying a fee, a person decides to not have the work completed, and they send a letter to the SEO stating that they have no intentions of completing the work, the Township will send them a refund for the unused fees.

Each lot in a proposed subdivision, must have an area tested that complies with the soil requirements and isolation distances for a primary and replacement sewage disposal system. This includes a replacement area for a lot with an existing septic system. Two test pits are required at the minimum to identify a suitable area.

When engineering or consulting services are required by the Township to complete their review of a permit application, the applicant shall pay all expense incurred by the Township.

If a person requires work from the SEO that is not covered by the above that person shall pay the Township the SEO's hourly rate plus all expenses acquired completing that work.

If the fees are revised before a stage is complete, the new fee must be paid.

One hour is allotted for tests pits and site inspections. Additional time must be scheduled.

EXAMPLES OF MINIMUM FEES

application with testing		minor repair	
application	100.00	application	100.00
site inspection	100.00	site inspection	100.00
two test pits	100.00	field check layout	100.00
percolation	300.00	check design	100.00
field check layout	100.00	approval to cover	100.00
check design	100.00	final inspection	100.00
pre-construction	100.00		
approval to cover	100.00		
final inspection	100.00
